

C5J022

Recommended use

- Protective paper for calender and continuous sublimations with high ink designs.
- Industrial plotters printing paper.

Description	Product features	Use	Applications
EXTRA REFINED CELLULOSE Gsm 22 ←cm→ 115, 165	protection diffusivity strength transfer rate	calander Industrial plotter	fashion home deco sport signage

Features and benefits

- **Higher productivity:** More linear meters per roll, fewer roll changes optimizing production time.
- **Optimal profitability:** Reduces transportation and storage costs.
- **Porosity:** The lowest on the market, achieved by mechanical refining and without chemical coatings.
- **Neutral PH:** It does not affect the colours and avoids the risk of staining the fabric in the sublimation process.
- **Adaptable:** It conforms to the felt avoiding horizontal displacements and the appearance of wrinkles.
- **Heat resistance:** Resists temperatures of 220° for 40 seconds without losing its qualities.
- **Storage:** It can keep its qualities for long periods of time when stored under controlled conditions and wrapped in plastic to avoid moisture.
- **Recyclable:** Product 100% recyclable and Ecofriendly (FSC).
- **Printable:** Used in industrial plotter for fashion and home textile productions, providing sufficient quality at low cost.

Dimensions and presentations

On demand: Roll length - diameter - weight / or cut according to customer requirements.
